Why Access DNSI?

ACCESS DNSI is a company Mid-South area businesses are looking toward to provide cost effective, reliable cabling and network solutions. But don't take our word for it. . .

Access Data Network Solutions Inc. has installed data cables and fiber optic backbone cable in the Memphis City Schools for the past five years. The work installed by Access well surpasses the quality of work that performed by other vendors working for the school district. Access not only has shown outstanding workmanship in installing fiber optic and data cables, but has also shown to be professional in maintaining the integrity of firewall penetrations. Many schools that Access has worked in has expressed how courteous the worker performed their jobs with little or no classroom interruption. It was also brought to my attention on how well Access followed all safety rules and job site cleanup.

Victor Flanigan - Memphis City Schools

Whenever we have problems, or questions, we know we can depend on your company. All of your employees have been timely, dependable, and courteous in all situations. This is an extremely busy office, with our phones being a high priority to keep this office going; we know your staff has the knowledge and skills to keep our communications up and going.

Diane Sumrall - NEPCO

Access DNSI not only completed this project ahead of schedule but the quality of work produced is above average and should be considered second to none. I have an excellent level of comfort in dealing with ACCESS DNSI, and would recommend them to anyone looking for a professional network contractor. Mr. Castellaw and ACCESS DNSI are held in the highest regard here and are to be commended for all their efforts and superior performance.

Tion L. Helaire- Boise Cascade

I can recommend Access DNSI without reservation. They have been a key contributor to our success in installing a citywide LAN/WAN ATM infrastructure for Memphis City Schools. This installation has allowed Memphis City Schools to implement one of the most current technological networks with Voice, Video and Data capability.
